Patient Rating	300 lbs (136 kg)
Table Height	28" (71cm)
Wheels	All legs & 2 with locks

The **FI-3199** Mobile X-Ray Table offers a great balance between quality, versatility and economy. The **FI-3199** tables are designed for extreme stability and longevity, complimented with excellent radiolucency from a table top to reduce radiation exposure for patients and extend the life of x-ray tubes.

The **FI-3199** Mobile X-Ray Table is made with a heavy-duty steel frame to provide maximum rigidity. The frame with the radiolucent tabletop can support up to a 300 lb. (136 kg) patient weight. The optional 12" drop leaf can support 20 lbs and is available for right or left side installation.

This table height is **28" high (71 cm)** for easy patient access. The **24" width (61 cm)** is standard, and the length is available at **76" (193 cm)** or **56" (142 cm)**. The included **Grid Cabinet & Cassette Tray** travel the entire length of the table enabling imaging studies anywhere along the length of the table. Grid is included in 103 LPI, 8:1 ratio style. Other grid styles available upon request.

Comes fully assembled except for the 4 legs that must be bolted to the bottom of the table. 1" thick (2.5 cm) radiolucent mattress or 4" thick (10 cm) non-radiolucent comfort mattress are available options.

*The **FI-3199** sets the standard today for cost-effective mobile X-ray tables.*
