
Protec PROGNOST

Mobile X-Ray Tables
An Elegant, Versatile Radiographic Solution

PROGNOST XP/XPE/XPE-Akku

The **PROGNOST** line of mobile x-ray tables offers the ultimate in positioning flexibility, stability and versatility. These tables are available in fixed height or adjustable height versions that use 110-240VAC or battery power for complete mobility. Optional accessories allow customization of the table to meet specific user requirements. The **PROGNOST** tables are designed for extreme stability and longevity, complimented with the maximum radiolucency from a carbon fiber floating table top that reduces radiation exposure for patients and extends the life of x-ray tubes. Composite tabletops are available to reduce cost. Their pleasing design not only provides patient-friendly table height and variability, but also is well-suited for use with swivel U-arm and Z-motion systems for digital and classic radiography.

The **PROGNOST** tables are manufactured by Protec in Germany in compliance with DIN ISO 9001:2000, IEC, TUV, CE, CSA, and UL quality standards.

The PROGNOST X-Ray Tables set the standard today for mobile radiographic tables.

Protec PROGNOST

Mobile X-Ray Tables

XP Version

- Mobile patient table with a fixed height
- Open construction allows quick positioning of table & patient above the image receptor
- Carbon fiber or composite 4-way float table top with a large range of movement for optimum positioning of the patient
- Solid construction for patient capacity of 500 lbs (230 kg) with composite top and 550 lbs (250 kg) with carbon fiber tabletop
- Table top available in 79" (200 cm) or 89" (226 cm) lengths and in 25.75" (65.5 cm) or 29.75" (75.5 cm) widths
- Patient-friendly height of table top of 30" (76.5 cm)
- Easily set and releasable foot brakes for the wheels
- Table top edge available for mounting patient positioning accessories
- Easy to integrate a bucky that can be manually moved in longitudinal direction
- Compatible with film/CR cassettes or DR Flat Panel detectors

XPE & XPE-Akku Versions

XPE is same as XP version except ...

- Motor driven height adjustment between 23.5" (60 cm) and 34" (86 cm)
- 3 different heights can be programmed and stored by the user
- Optimal positioning possible by using the height adjustment
- Power connection necessary for table height adjustment

XPE-Akku is same as XPE version except ...

- No power connection necessary for table height adjustment due to battery-driven motor
- 2 rechargeable batteries supplied
- Separate charging station included
- Runs off battery power for table height adjustment

OPTIONAL ACCESSORIES

• **Bucky with Cassette Tray**
Can accommodate film cassettes, CR cassettes, & DR flat panels. This bucky tray is installed on a rail system to allow it to slide from one end of the table to another. The whole body can be imaged without patient movement.

• **Mechanical Pivot**
Pivot the table when needed and always return to the exact original location

• **Handgrips**
Use for precise table adjustment and positioning

• **Patient Handrail**
Aids the patient in ascending to and descending from the table

• **Mattress**
Foam padded with a washable plastic cover

• **Compression Band**
Provides compression to restrict movement in the area being radiographed

And more ...

• **Protective Edge Strips**

• **Protective Rails**

• **Center Stops**
