# *Protec PROGNOST*

## **XP Mobile X-Ray Table**

*A Simple, Elegant Radiographic Solution*

The PROGNOST line of mobile x-ray tables offers the ultimate in positioning flexibility, stability and versatility. The **XP Model** is a fixed height version that requires no power for mobility or 4-way tabletop float. Optional accessories allow customization of the table to meet specific user requirements. The PROGNOST tables are designed for extreme stability and longevity. A 4-way float composite material tabletop offers excellent radiolucency and enables artifact-free images. Carbon fiber is available as an optional tabletop material for maximum radiolucency and lowest dose that reduces radiation exposure for patients and extends the life of x-ray tubes. Use the **XP Model** with U-arm x-ray systems, or add a Grid Cabinet & Cassette Tray for use with mobile, ceiling mount, or wall mount x-ray.

The PROGNOST tables are manufactured by Protec GmbH in Germany in compliance with DIN ISO 9001:2008, IEC, TUV, CE, CSA, and UL quality standards.

*The PROGNOST X-Ray Tables set the standard today for mobile radiographic tables.*
